### **Watersplash Farm – Shepperton**

Following an initial public display in January 2012 and regular discussions with local residents groups, a planning application for gravel extraction at the Watersplash Farm site in Shepperton was submitted to Surrey County Council late last year. It is expected that the application will be determined some time later this year.

In the meantime, and in order to update local people on the amended plans, a second public display is to take place at the Holiday Inn, Shepperton on Friday and Saturday, 22<sup>nd</sup> and 23<sup>rd</sup> March. The display will be open from 1 p.m. until 8 p.m. on the Friday and from 9 a.m – 1 p.m. on Saturday.

CEMEX's Community Affairs Manger, Ian Southcott, added: 'We have had some very constructive meetings with the two local residents' groups and we have listened to the issues that are of concern to them. As a result we have been able to amend the plans and enhance the restoration proposals for the site'.

The exhibition of the proposals will provide a further opportunity for local residents to view and discuss the plans with representatives from the company. Details are also available on the company's website [www.cemexcommunities.co.uk](http://www.cemexcommunities.co.uk)

The extraction of these materials essential for the local building trade will be undertaken over a relatively short period of time of about four years. Following extraction, the site will be restored

to farm land with additional nature conservation and enhanced public access through a footpath network.

**ENDS.**

**CEMEX**

CEMEX is a global building solutions company and leading supplier of cement, ready mixed concrete and aggregates. In the UK, CEMEX also has a significant share of the asphalt, concrete block and mortar markets. The company has a national supply network in the UK with over 450 locations, to ensure that quality building materials are available to customers locally.
